

JIE XU

Email: xj47@mail.ustc.edu.cn

Website: <https://xujie.ink>

RESEARCH INTERESTS

- Cyber security and privacy preservation
- Computer security and Applied cryptography

EDUCATION

University of Science and Technology of China (USTC)

Sep. 2017 - now

MSc in Electronics and Communication Engineering

Advisor: professor Peiling Hong and associate professor Kaiping Xue (IET fellow)

University of Science and Technology of China (USTC)

Sep. 2013 - Jul. 2017

Major: BSc in Information Security

GPA:3.46/4.30 (85.15/100); Rank: 9/58 (the first among female students)

Minor: BSc in Science and Technology Communication

English Proficiency: IELTS 7

PUBLICATIONS AND PATENTS

- Jie Xu, Kaiping Xue, Hangyu Tian, Jianan Hong, David S.L. Wei, and Peilin Hong “An Identity Management and Authentication Scheme Based on Redactable Blockchain for Mobile Networks,” IEEE Transactions on Vehicular Technology. (Accepted)
- Jie Xu, Kaiping Xue, Shaohua Li, Jianan Hong, Peilin Hong, and Nenghai Yu “Healthchain: A Blockchain-based Privacy Preserving Scheme for Large-scale Health Data,” IEEE Internet of Things Journal, vol. 6,no. 5, pp. 8770-8781, 2019. (Full paper)
- Jie Xu, Kaiping Xue, Qingyou Yang, and Peilin Hong, “PSAP: Pseudonym-based Secure Authentication Protocol for NFC Applications,” IEEE Transactions on Consumer Electronics, vol. 64,no. 1, pp. 83-91, 2018. (Full paper)
- Qingyou Yang, Kaiping Xue, Jie Xu, Jiajie Wang, Fenghua Li, and Nenghai Yu, “AnFRA: Anonymous and Fast Roaming Authentication for Space Information Network,” IEEE Transactions on Information Forensics and Security, vol. 14, no. 2, pp. 486-497, 2019. (Full paper)
- Peixuan He, Kaiping Xue, Jie Xu, Qidong Xia, Jianqing Liu, Hao Yue, “Attribute-based Accountable Access Control for Multimedia Content with In-network Caching,” in Proc. of 2019 IEEE International Conference on Multimedia and Expo (ICME 2019). (Full paper)
- Wei Meng, Kaiping Xue, Jie Xu, Jianan Hong, and Nenghai Yu, “Low-Latency Authentication Against Satellite Compromising for Space Information Network,” in Proceeding of the 15th IEEE International Conference on Mobile Ad Hoc and Sensor Systems (MASS2018). IEEE, 2018, pp. 237-244. (Best paper Runner-up Award)
- Kaiping Xue, Yongjin Ma, Jianan Hong, Jie Xu, Qingyou Yang, “Secure and Efficient Token Based Roaming Authentication Scheme for Space-earth Integration Network,” Journal on Communications, vol. 39, no. 5, pp. 48-58, 2018. (Full paper)
- Patent: “Anonymous and Fast Roaming Authentication for Space Information Network” (Details)

PROFESSIONAL EXPERIENCE

Future network security

Mar. 2018 - now

- **Project:** Future Network Architecture and Protocol Evolution

- Proposed Healthchain, a large-scale health data privacy preserving scheme, where data are encrypted to conduct fine-grained access control. Evaluate communication and computation overhead.
- Designed a self-sovereign identity management scheme in distributed trust environment, which allows users to control their identity and personally identifying information. Provide an efficient and fine-grained dynamic user revocation method by utilizing the chameleon hash instead of traditional CRL.
- Proposed a distributed cryptocurrency trading scheme to solve the problem of centralized exchanges. Deployed our scheme on the Ethereum test network and analyze the cost of the contract deployment.

The next generation network

Dec. 2016 - Feb. 2018

- **Project: Information Security Technology for Space-Air-Ground Integration Network**
- Learned user access control and mobility management in 3GPP 5G
- Provide a new authentication system model of the Space Information Network, and proposed a secure and efficient access authentication scheme.
- Strengthened the authentication function of LEO satellites, and proposed a two-way token based roaming authentication scheme and a fast roaming authentication scheme.

Network security protocol design

Apr. 2016 - May. 2017

- **Project: Lightweight remote communication method on data link layer**
- Constructed a remote low-power wireless information collection platform based on long-distance communication chips SX1278.
- Designed a data link layer protocol for self-organizing modules to reduce energy consumption.
- Implemented an APP to allow the user to control the sensor node to collect data.

IoT security

Sep. 2015 - Oct. 2016

- **Project: Secure and Reliable Control Mechanism of Household Intelligent Devices**
- Proposed a scheme in which the home data is encrypted and transmitted to the cloud storage, and the mobile terminal can control the smart home device at the same time.
- Designed a secure authentication and key agreement protocol for preserving privacy in NFC and provide the formal security verification using AVISPA tool and formal security analysis using ROR model.

OTHER EXPERIENCE

- Teaching Assistant, Computer Network, USTC, 2018
- President of the Association of Jun Xing, 2017
- Visiting Student at Shenzhen Institutes of Advanced Technology, Chinese Academy of Sciences, 2016
- Visiting Student at Changchun Institute of Chinese Academy of Sciences, July 2015

HONORS AND AWARDS

- National Scholarship for Graduate Student (Top 1%, National, 2019)
- Best Paper Runner Up Award of IEEE MASS 2018 (Top 1%, International)
- Outstanding Graduate Student Scholarship of USTC 2017, 2018 (First class)
- Excellent Graduation Thesis of USTC 2017
- Honor of “Wang Daheng Talent Program in Optical and mech-electronical Science and Technology”
- Outstanding Student Scholarship of USTC 2015, 2016
- Excellent Team Award of USTC 2015

SKILLS AND HOBBY

- Programming Language: C/C++, Python, JAVA, MATLAB, 8086 Assembly Language
- Hobby: Playing Guzheng (Chinese national musical instrument, Level 10, the highest level)
